EDUCATION

University of Victoria – B.Sc. Computer Science, 2nd Year

September 2023 – June 2028

TECHNICAL SKILLS

Developer Tools | VS Code, Git, Arduino IDE, Jupyter Notebook

Programming | Python, Java, C, Assembly, HTML

Other Tools | Notion, Slack, Sketch, Google Docs, Google Sheets, Google Slides, Adobe Illustrator, Canva

TECHNICAL PROJECTS

Interactive LCD Display System | AVR Assembly (Arduino)

- Designed a dynamic 2×16 LCD interface using interrupts, timers, and keypad input.
- Implemented scrolling messages, flashing text, and directional controls using real-time ADC inputs.

Student Performance Insights Tool | Python (pandas)

- Built a data-driven analyzer to process and classify student performance using pandas and NumPy.
- Automated grade computation, multi-criteria filtering, and CSV export through modular, testable code.

WORK EXPERIENCE

Community Leader (CL) — University of Victoria Residence Services

Victoria, B.C

August 2025 – Present

- Build community for 40+ residents through events, peer support, and conflict resolution.
- Plan and promote residence-wide programs while managing a \$200 semester budget.

Barista — Starbucks Coffee Company

Langley, BC

May 2025 – July 2025

- Deliver fast, friendly service and maintain high operational standards in a team environment.
- Support efficiency during peak hours through multitasking and clear communication.

VOLUNTEER EXPERIENCE

Volunteer — Punch Out Parkinson's

Victoria, BC

May 2025 – August 2025

- Assist elders with Parkinson's, arthritis, and mobility challenges in guided exercise sessions. Encourage independence and confidence through movement-based support.
